***Interviews***

*mortality*

*morbidity*

- 3. The life-course perspective should be utilized to ensure that black women are healthy prior to, during, and after pregnancy because addressing health during pregnancy is too late*

*4. Medicaid should be expanded and additional protections should be put in place for black mothers*

- 5. The District needs to utilize innovative models of care to address black maternal mortality*

***6. Providers need to explicitly address race, racism, and weathering***

***8. Multi-sector partnerships must be utilized, especially CHCs***

*Policy Recommendation 2: Increase funding for CHCs and expand family planning /*
